Google Drive <http://www.google.com/apps/intl/en/edu/drive.html>

Keep your files in a safe place with Google Drive

- Even if your device is lost, stolen or damaged, your files are backed up to Google's cloud. And with business-grade security and reliability, feel at ease knowing that your data is safe in Google Drive.
- Gives 5 GB of storage free
- Can be accessed anywhere
- Bring files to life
- Open and view any file

Innovative tools for the connected classroom

Free – Google Apps is free (and advertising-free) for students, faculty, and staff at qualifying educational institutions.

Secure – SSAE 16 Type II audited. Your data is private and secure, with 99.9% uptime and best in class disaster recovery at no charge.

Anytime, Anywhere – Since it's all browser-based, it's easy for teachers and students to work from any computer, without purchasing expensive software.

Protected – Define email filters to limit messages within your school domain and configure your sites and documents for school-only sharing.

Collaborative – Increase classroom engagement and assessment with real-time collaboration tools.

Gmail

<http://www.google.com/apps/intl/en/edu/gmail.html>

- * Your school can have its own domain
 - Keep your school name and domain
 - accessible anywhere with internet
 - Each user gets 25 GB of email storage
- * Will group all messages that refer to one subject line together into one conversation (don't have to search previous emails send)
- * Less Spam

Google Groups <http://www.google.com/apps/intl/en/edu/groups.html>

- * Easy, safe sharing
- Users can share docs, calendars, sites, shared folders and videos with a group instead of individuals
- * Less clutter and noise
- * Reply on behalf of a group

Calendar <http://www.google.com/apps/intl/en/edu/calendar.html>

- * Can have multiple calendars in one
 - example: Ipad cart schedule (can reserve ipads and coordinate it with my lessons quickly and efficiently)
- * Share with classes, teams, groups
- * Publish calendars for students, parents, and supporters
 - Publicize big school events by publishing an events calendar for all to see.

Documents <http://www.google.com/apps/intl/en/edu/docs.html>

- * Classroom collaboration
- * Colleague collaboration. I can choose who can edit and who can't
- * Revision history allows users to review (and revert) document edits over time.
- * Easily upload and share files

Forms

- Are great for class openers. Students know when they walk in to class, they must open gmail and go to the form I sent them. Students fill out the form and now you are ready to begin class
- The results from the forms are instantly put into a spreadsheet that I access and know right away the results
- It is graded and no paper exchanged hands
- It includes the date and time the form was submitted from my students

Spreadsheets

- Google apps
 - already made templates so you don't have to recreate them

Google Webpage for my classroom

<http://www.google.com/apps/intl/en/edu/sites.html>

- Easy to use and lots of things are easily accessible
- Can change in minutes

And much more...

Applications for your school
