Krista's Top 10 Apps

Notability - you can send worksheet as pdfs to your students, they write or type directly on the worksheet. Saves on paper! Has lined paper and notes within.

Number Pieces - has base ten blocks and the students can change colors of the blocks.

Storia - Use with your scholastic account, you can purchase interactive books that have comprehension question within. You can have up to 10 bookshelves.

ScotPad - requires signing up, you can create student's learning paths in reading or math. You can also add other assignments. See what standard or concept that you students have mastered or need to work on.

Sight Words 2 - sight word app that has multiple games to keep kids practicing their sight words.

NearPod - allows you to control the student's iPads. You can add your powerpoints and make them more interactive.

KidsDoodle - easy-to-use painting application that is neon/glow in the dark.

MeerKat Math - a fun way to practice math facts by racing a meerkat.

Discover Apps - a simple way to search for connected apps.

Bill Nye - full of different science activities by Bill Nye The Science Guy

Kathy's Top Ten List

AppsGoneFree- if you do not have this app what are you waiting for? An app that shows you apps that are free that day, I have gotten apps that cost up to \$99.00 on this app.

White Noise Lite- offers a variety of sounds that can be used to reduce distractions for those who are sensory sensitive, it can also be used for study or sleep assistance

Chore Pad- allows you to tie a list of chores, their "value" and statistics to several devices through dropbox

Must Do Today- great app for time management, can set alarms and make lists, has snazzy check boxes too.

myHomework Student Planner- a good app for students who need a paperless version, not great but good

Hourglass- visual timer, like a sand timer

Memorize- memorize anything, record yourself and listen to it over and over

typeDrawing for iPad- using letters and symbols to make drawings, cool

NxtApp- great advanced math app, practice exponents down to simpler math equations

Pocket Tutor- great math app, needs no internet connection, has video clips and printable worksheets for practice.

MUST HAVE SITES:
